CoatingSolutions

DuPont Alesta Tex Powder Coatings

DuPont textured powders add a touch of individuality to any product, without compromising any of the functional properties for which powder has become so well known.

Available in both Polyester and Epoxy Polyester technologies, the colour range and gloss levels are limited only by your imagination, whilst the excellent mechanical properties and chemical resistance make the finish suitable for market sectors such as;

Virtually limitless colour choice coupled with a leatherette finish offers a wide variety of options to both the designer and manufacturer.

- Heating & Ventilation
- Electrical & Electronic Goods
- Furniture & Cabinets
- Lighting & Tracking
- Shopfitting

Why Textured Powder?

Excellent Performance:

A high level of impact and scratch resistance plus edge protection is achieved through only a single layer coating. The coating also resists attack and staining by a range of foods, drinks and household cleaning agents.

Powder is an environmentally friendly product with strong functional properties such as high impact and abrasion resistance, built in from the start.

Ease of Application and Low Process Cost:

Easy spray application with material transfer efficiencies of up to 98% (because of the recovery and re-use of the overspray) substantially reduces the applied cost. Fast application compared to liquid coatings also means lower labour costs with no waste treatment requirements.

No Issues with Volatile Organic Compounds:

Powder coatings are 100% solids, so no VOCs are evolved during the curing process.

A Cleaner and Faster Production Process:

Alesta Tex

DuPont Alesta Tex powder coatings can be ordered in as little as 10kg quantities and be delivered normally within four working days, or as a special order service in as little as 48 hours.
